Honeywell

ALLERGEN CONTROL 12000 AIR FILTER

Change your filter with the season.

Determining how often to change your filter is dependent on many factors in your home:

- Use of an electrostatic pleated filter or a basic fiberglass filter
- Pets in the home
- Fireplace / Stove / Candle smoke
- Windows open / closed
- Home improvement projects

Your home environment may suggest that you change your filter once a month or once every three months. Using the change of season as an easy reminder to change your furnace filter will help keep your HVAC system running efficiently.

Installation Instructions

Arrows show direction of AIR FLOW through filter. 

1. Remove plastic wrap and paper insert from filter. Do not cut or remove cardboard frame.

WARNING: TO AVOID DANGER OF SUFFOCATION, KEEP THIS FILM AWAY FROM BABIES AND CHILDREN.

2. Insert filter into the designated opening in your home furnace or air conditioning system with the arrow on the frame pointing towards the blower motor.

With all air filter purchases, be sure to refer to your heating/cooling system Owner's Manual to ensure the filter you are about to use is compatible with your system.
